

DISAWET

Disawet is the advanced cleaning and stickie control program. We address the full spectrum of contaminants, including sintetic glues with precision. The program can be applied to all papermaking systems and meet customer requirements in 100%, with recycle or virgin pulp.

01

**Disaggregation,
Wetting
and Deinking**

Fiber wetting and disaggregation. Paper colorants and pigments dispersing. Detackifying paper contaminants.

- Disawet RU • Disawet DA
- Disawet DES • Disawet AC

02

**Fiber
Recovery**

Disaggregation Agent - Reducing losses of usable waste fiber.

- Disawet PY

03

Micro-fixation

Retaining the pitch and stickies contaminants in the sheet - by micro-fixation.

- Disawet 539

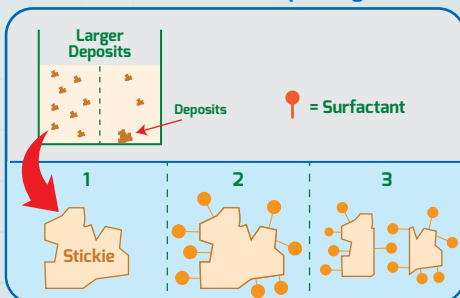

04

**Felt Cleaning
& Conditioning**

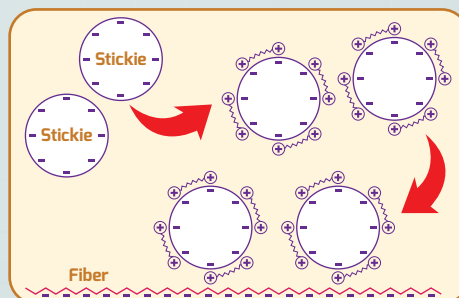

Batch on-the-fly and batch cleaning applications.

- Disawet 183
- Disawet 500
- Disawet 2474

Contaminants Dispersing

Contaminants Micro-fixation

Benefits

- Reduce downtime;
- Increase machine runnability;
- Reduce furnish costs;
- Improve converting efficiency;
- Increase brightness;
- Improve sheet quality;
- Reduce solvent usage;
- Increase clothing life.
